

Steel components Classic B

Product specifications

Type of corrosion protection:

- Zn 95% + Al 5%
- Class A according to EN-10244-2

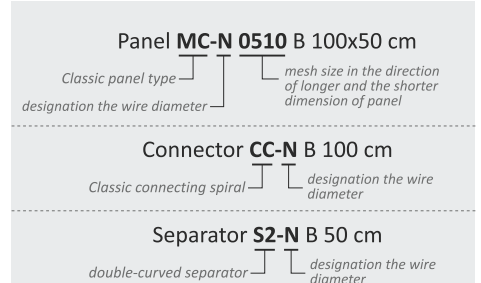

Product description:

Steel components **Classic B** are made of steel wire with corrosion protection by hot dip galvanizing with addition of aluminum (*Zals*). They are used for the construction of retaining walls, steep slopes or gabion structures.

- 1 large selection of components provides a wide technical variability
- 2 simple and quick assembly elements
